

ARADIANT® Arc UV

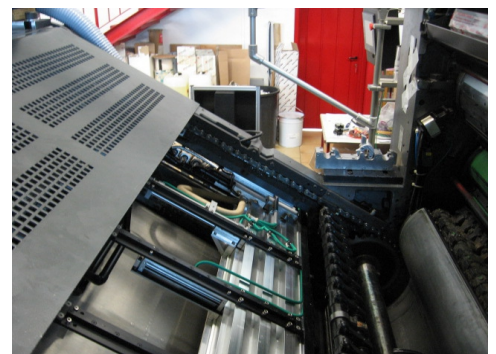

With more than 35 years of manufacturing specialty UV systems, we have the experience to tailor a UV solution to fit your needs. Aradiant constructs all of the major parts in-house which enables us to customize systems efficiently. *We install, service, and support all equipment from our Pennsylvania factory.*

These unique features define our thinking in arc lamp UV:

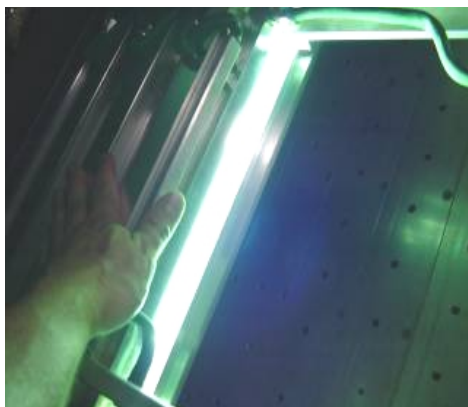

- Coolest running – patented 100% refrigerated water cooled.
- Smallest size - only 2.5" (63mm); fits in confined spaces
- No ozone or air exhaust – no ducting to take up space

TWINHEAD LED UV

Just like our arc lamp technology, Aradiant offers customized LED solutions to suit your specific needs. Rather than one design, **Aradiant can fit or retrofit into any printing press!**

- More Power – up to 40w/cm²
- Longer Exposure – more time under the LEDs
- Broader frequency range – multiple combinations available

Twinhead or single array options available – combine any wavelengths of LEDs

- Total refrigerated water-cooling allows greater power in a small package.
- Available in any length.....from 1" to 144" (25mm to 3650mm)
- Customized to be installed on any type of equipment that requires UV curing.
- Factory installed and serviced

Aradiant's higher power comes at a lower price!

Aradiant manufactures UV for *all* types of machines
